Profile

I am a dedicated and enthusiastic student pursuing a BSc in Applied Software Engineering at Cardiff University. My passion for technology and software engineering has driven me to develop a broad range of skills essential to the industry.

Key Strengths

- **Problem-Solving:** Through continuous coding practice, I have honed my ability to solve complex challenges with innovative solutions.
- **Communication Skills:** Interactions with clients have enhanced my ability to understand their needs and convey suggestions clearly and effectively.
- **Teamwork:** Collaborating on various projects has strengthened my ability to work well within teams and deliver high-quality software solutions.
- **Continuous Learning:** I am committed to lifelong learning, always seeking opportunities to apply and expand my knowledge in real-world settings.

Technical Skills

- **Programming Languages:** Proficient in Dart, Python, Java and JavaScript.
- **Development Tools:** Experienced with version control systems, including Git and GitLab's.
- **Web Development:** Skilled in building web and mobile applications using frameworks such as React for web development and Flutter for cross-platform mobile development.
- **Software Engineering Techniques:** Proficient in wireframing, writing user stories using Jira, and automated testing.
- **APIs and Databases:** Worked with REST APIs (e.g., HUE REST API), SQL, and NoSQL databases using Firebase.
- **Data and DevOps**: Hosted a backend server coded in JavaScript stored in Firebase to handle background processing. Also used Azure for a different application to deploy a web app.

Experience

- ***Business Fights Poverty – Software Engineering Internship*** ***August – Present 2025***
  - Developed an interactive chatbot with python backend and react frontend, deployed on Azure cloud services.
  - Implemented file uploading and parsing, enabling users to ask questions and receive context aware answers using natural language processing.
  - Focused on building a scalable and user-friendly solution.
  - Worked effectively under pressure while maintaining quality service.
- **NatWest – Software Engineering Work Experience** *12th – 25th August 2024*

- Worked with HBO Digital X.
- Gained insight into software engineering at a large company through meetings, workshops, and coding sessions.

- **Doorstep Promotions – Employee Management app** *August 2024 – August 2025*
  - Delivered a client-focused product within a fixed timeframe, improving time management skills.
  - Setup regular meetings with client, setting clear goals.
  - Used Jira to track progress with user stories.
  - Enhancing social skills through clientele interactions.
- **Booking Website for Cyber Innovation Hub:** *November – December 2023*
  - Worked as a team by holding regular stand-up meetings and code reviews.
  - Designed and developed a website using industry-standard practices, with version control.
  - Speaking with clients to understand their vision to product a high-quality product.
  - Coded front end with Web technologies and back end using flask and python.
  - Used GitLab's to create user stories and assign them accordingly
- **Home Automation App:**
  - Integrated with HUE REST APIs to access available devices.
  - Built a backend server for API requests in JavaScript to interact with devices.
- **Cocktail Selection App:**
  - Implemented user authentication, creating a user-friendly login page that is easy to use.
  - Used NoSQL database which stored key value pairs of Stringed data.
  - Managed cocktail recipes and data with Firebase.

Education

Cardiff University *Sept 2023 – Present*

BSc Applied Software Engineering, 2:1

Wellingborough School, London Road, Wellingborough *Sept 2015 – July 2023*

- A-Level
  A – EPQ, B – Computer Science & Maths, Grade C – Physics
- GCSEs
  9 – Computer Science, Physics, Spanish, 8 – Biology, Chemistry, 7 – English Language, English Literature, Maths & Geography, 6 – Design Technology
